

Deep MEDITECH Expertise. Real Solutions.

Blue Elm is a healthcare technology company that specializes in MEDITECH data solutions. Over the past 25+ years, we have helped hospitals and health systems access, extract, validate, and optimize their data.

The MEDITECH Data Specialists

Blue Elm was founded by former MEDITECH employees who understand the complexities of working with MEDITECH data — and recognize opportunities to make the data more efficient and impactful. What started as a solution to validate data repository (DR) accuracy has evolved into a comprehensive suite of products and services trusted by 500+ hospitals and vendors worldwide.

Every member of the Blue Elm team brings hands-on MEDITECH experience in areas such as interface design, data repository development, and implementation. We specialize in MEDITECH technology, and that expertise is the foundation of everything we build.

Why Choose Blue Elm?

Experience

Trusted by 500+ hospitals and technology vendors.

Depth

Expertise across all MEDITECH platforms — Magic, C/S, M-AT (6.x), and Expanse.

Value

Scalable MEDITECH solutions with measurable ROI.

Speed

Extraction and product implementation in days, not months.

Data Extraction & Conversion Services

Extract structured, unstructured and archived data quickly and efficiently across all MEDITECH platforms (MAGIC, C/S, M-AT, and Expanse) with zero downtime. Support system conversions, legacy application decommissioning and other needs for extracted data.

Benefits:

- Fast, accurate bulk extracts
- Minimal MEDITECH server impact
- Flexible scheduling of exports

Experience with all data, such as:

- Transactional scalar data
- Report extractions (including EMR reports)
- Optical disk

Data Access Solutions

OPENGATE

Make your data easily accessible to external applications and platforms in real-time.

- Direct MEDITECH data access for writing reports, applications, interfaces and more
- Easily integrates into custom applications
- Used with SQL Server and Power BI
- Assists with writing queries
- Magic, C/S, M-AT (6.x) and Expanse supported

FLUX

Capture MEDITECH historical transactional changes in real-time.

- Operates parallel to production environment
- Record every transactional change in any standard database
- Create audit trails, analyze trends, track user activity and more
- Pair with OpenGate™ for full data visibility
- Expanse supported

Data Integrity Solutions

DRAUDITOR

Validate your MEDITECH Data Repository (DR) and resolve discrepancies.

- Fast, accurate validation
- 100B+ rows validated across 200+ sites
- Pre-created audits and reports
- Save hours per day vs manual audit processes
- Magic, C/S, M-AT (6.x) and Expanse supported

DRDASHBOARD

Provide complete monitoring of your data repository, giving you instant visibility into data latency, table size, and growth.

- Observe the overall health of your data repository
- View activity and errors
- Receive alerts on halted jobs and transfer issues
- View SQL Server health
- Magic, C/S, M-AT (6.x) and Expanse supported
